

2021 Southern Nevada Point-In-Time Results

The 2021 Southern Nevada Point-in-Time Count was a community-wide effort conducted on January 27, 2021. Due to the COVID-19 pandemic, this year's count required a change in methodology and a random sample of the County was canvassed by teams of service providers and outreach workers. A survey was administered the day and night of the count to persons experiencing homelessness in order to profile their experience and characteristics. The US Housing and Urban Development Department (HUD) has strongly recommended to view the 2021 Point-in-Time Count as a stand-alone data set. The findings should not be compared to prior or future PIT count numbers.

5,083

People were experiencing homelessness in Southern Nevada on January 27, 2021

306 individuals were in Families with Children

304 individuals were unaccompanied youth and young adults

644 individuals were Veterans
